

Amendments to the Specification

Please replace paragraph [0057] on page 15, lines 9-15, with the following amended paragraph:

[0057] Additionally, the present invention may employ point of presence features 602, allowing a user such as AI to limit his availability throughout the work day by modifying his connection options according to his schedule. By communicating with the server (through the web or by phone), a user such as AI may have his connection options track his appointment schedule. It is also contemplated that group scheduling software 604 standard in the art may be used to modify the connection options throughout an enterprise.
